

Cards activity

In this section of the project, we will be providing fun ideas for cards! Be it postcards, business cards, Pokémon cards; whatever the creative minds can offer! Provided below are some images of samples and ideas for information that could be on the cards.

Purpose: The kids will be taking the research into their own hands. This will encourage the familiarization of our native bird species within them. We hope this will give them more reason to care about the birds that come back to Canada and make a big effort to encourage their families to take precautions for birds.

Suggested information on cards:

Name of species

Their migration patterns

Behavioral reactions

Life cycle

Feeding habits

Mating season

Mating calls

Flight patterns

Defensive behavior

etc.

I can't wait to come back to Canada. The grass is good. I left at first because everything froze, but now that its warm, I just miss my birth place so much. Maybe I'll go back to the south when the pond is frozen again. ♡
